Stronghold® Adjustable Framer Instructions #9500 / #9550

For approximate appropriate sizing of your Stronghold® Adjustable Framer, follow the instructions below:

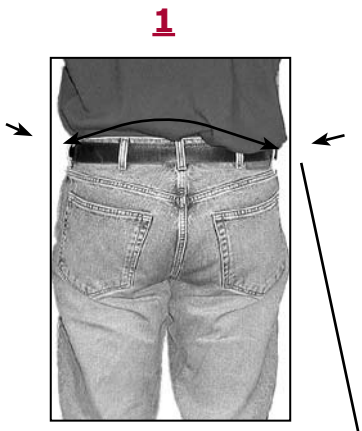
1. Take a tape and measure across your back where you would wear your toolbelt from center to center of each hip, then subtract 1”.

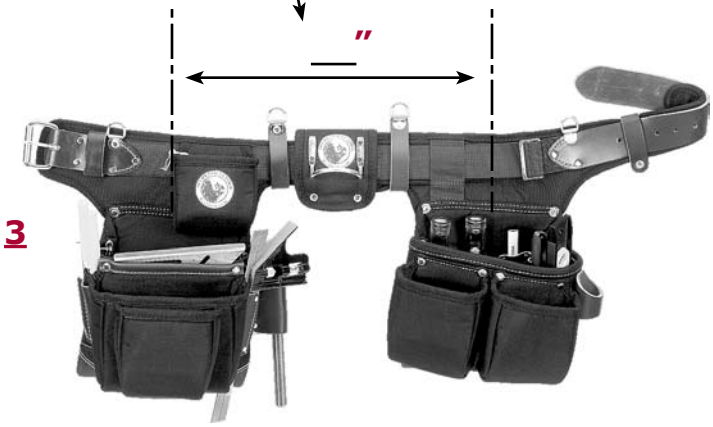
2. Pull end of strap free from OxyLock™ to loosen strap.

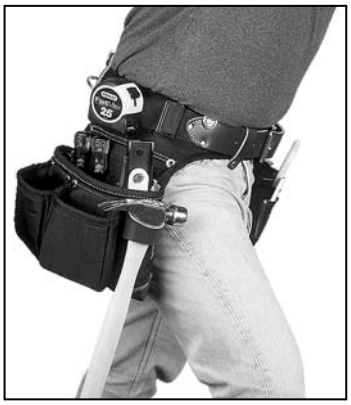
3. Lay belt on table and adjust bags center to center to the measurement taken in step 1.

4. Thread strap back to lock position. You are now ready to get back to work.

5. You may make minor adjustments to suit your personal preferences and bulky clothing.







Use pre-installed D-rings to attach to Occidental Leather suspender systems #1546, 5009 & 5055.
